

# CONCENTO™ RDG

*Reducing MDG implementation cost and schedule by 50%.*

Many organizations want to benefit from the data quality improvements delivered by SAP MDG, but many of these same organizations attempt to deploy MDG with an outdated project approach that increases cost and schedule. Concento RDG empowers our customers to adopt a modern, agile approach with real-time prototyping and solution development in plain sight.

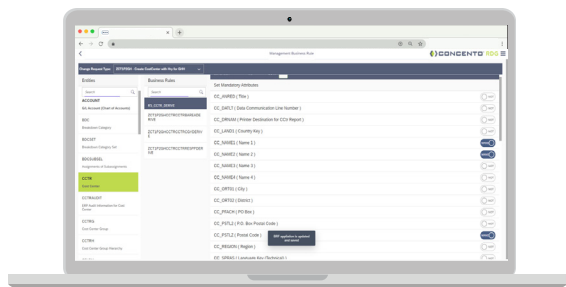

## THE CONCENTO™ RDG SOLUTION

Concento™ RDG automates many of the technical configuration steps that are required to implement SAP MDG. It offers a user-friendly interface and then auto-generates configuration entries in the MDG system. These automations allow the implementation team to configure the solution live in business workshops, and they create an average 50% reduction in time and resources compared to a typical MDG implementation.

### KEY FEATURES

- User-Friendly Interface
- Streamlined data model maintenance
- Graphical workflow creation and maintenance
- Easy BRF+ Rule Generation
- No development skills required

### KEY BENEFITS

- Agile implementation methodology
- Solution development in plain sight
- Improved solution alignment to business needs
- Average 50% MDG project acceleration
- Average 50% MDG project cost reduction

### **DATA MODEL MAINTENANCE**

Extend the MDG data model for Materials, Business Partners, Finance Master Data, or custom objects using a user-friendly hierarchical interface. Add entities or attributes in minutes.

### **GRAPHICAL WORKFLOW MAINTENANCE**

Build MDG approval workflows using a graphical self-documenting interface. Define inputs, approvers, and decision tables all from one easy-to-understand interface.

### **BRF + WIZARD**

Define BRF+ rules to perform data validations, derivations, and presence checks. Rules can be defined in the user interface and automatically written to the MDG configuration tables.

## **CASE STUDY**

A global Life Sciences leader is deploying MDG for Customer and Finance around the globe. The implementation project was originally estimated at \$2.2M. By using Concento RDG™, the project cost was reduced to \$1M for a total savings of over \$1.2M. The solution is being used for production sustainment and is creating significant savings in support resources.
